

Coiled tubing

As the cost of finding new energy supplies accelerates, the need to increase production from existing wells becomes increasingly important. Coil tubing services still play a critical role in workover operations, stimulating production and maintaining well performance.

Great White Pressure Control, part of Archer, provides coiled tubing packages, nitrogen, and pumping equipment designed to increase production and resolve well problems that would otherwise hinder the flow of oil and gas. Our multi-skilled professionals are dedicated to providing customers with reliable service and technical expertise to deliver cost-effective, safe, and successful completion of coiled tubing intervention services.

Our state-of-the-art equipment undergoes the most stringent maintenance processes in the industry provided by quality crews that are supported by our in-house manufacturing capability. Great White's own engineers design our equipment to ensure minimal downtime, integration of special safety features, and DOT compliance. The result is reliable delivery of equipment to a wellsite, quality service, and minimal downtime.

Great White is dedicated to providing our customers with the highest level of safety, outstanding service, experienced personnel and the best equipment in the industry. From our strategically located operating locations, we are able to offer our services throughout North America with operating capabilities in New Mexico, Texas, Louisiana, Oklahoma, Arkansas, North Dakota, Northeast, and the Rocky Mountain region. We have the capacity to expand to any desired location.

Our goal is to provide innovative solutions to our customers in a safe, efficient and effective manner.

Coiled tubing

Great White employs highly skilled and cross-trained professionals who are dedicated to providing our customers with superior service and technical expertise. Our field crews operate state of the art equipment and are backed up by field-experienced management and strong HSE and engineering groups.

Onshore

Great White provides coiled tubing units for land work In pipe sizes from 1 1/4" to 2 3/8" work strings. Our units are self-contained and optimized for DOT road compliance while retaining job site efficiency due to our proprietary equipment design that features a reduced number of lifts with faster rig-up and rig-down times. Great White offers a range of coiled tubing injectors and special reel trailers to accommodate the individual needs of each well serviced. Our equipment is rated to 15,000 psi and is suitable for service in corrosive environments with H2S and CO2.

Coiled tubing intervention services and applications

- Plug Drilling (post fracturing)
- Milling (scale, cement, etc.)
- Set/Pull Packers and Plugs
- Abrasive Jet Perforation
- Tubing Conveyed Perforation
- Extended Reach capability for Horizontal Wells
- Cementing/Squeezing
- Gravel Packs
- Frac with coiled tubing
- Shifting sleeves
- Plug and Abandonment
- Washout. e.g.: Drill Pipe, Tubing, Sand Screens, etc.
- Nitrogen Jetting
- Foam Cleanout
- Fishing Wireline and Tools
- Velocity String Installation/Maintenance
- Acid Stimulation
- Milling (scale, cement, plugs, etc.)
- Set/Pull Packers and Plugs
- E-Coil (logging)
