

# Archer-DARTT Recorder™

Digital pressure testing- A better way to pressure test

Regular pressure testing of well barriers is a vital contributor to well integrity and safety. The Archer-DARTT Recorder™ is military specification solid state platform with an ultra-precision digital pressure gauge and temperature sensor. This hardware is coupled with our proprietary embedded software to deliver sophisticated yet simple to use, plug and play advanced pressure testing tooling.

## STEP 1: Specify

Input test specification and equipment details systematically and easily using the wizard or pre-set tests.

## STEP 2: Test

Monitor the test with advanced health tools. Test result prediction provides a clear test decision path.

## STEP 3: Report

instant digitally signed automatic report. Cloud synchronization option for effortless & timely results transmittal

### Benefits

- Reduced rig time
- No false passes
- Removes result subjectivity
- Unmatched report traceability
- Increased safety
- Systematic test specification
- No manual report compilation

### Features

- Component assembly
- FAT and SIT
- Site receipt testing
- Pre-deployment testing
